

SHREYAS SONWANE

Java Full Stack Developer | Spring Boot • React.js • Microservices • Kafka • PostgreSQL

Chennai, India | +91-7447534278 | shreyashsonu2001@gmail.com | [linkedin.com/in/shreyash-sonawane242001](https://www.linkedin.com/in/shreyash-sonawane242001)

Java | Spring Boot | Spring Security | Hibernate | Microservices | Apache Kafka | REST APIs | React.js | Docker | Kubernetes | Redis | OAuth 2.0 | PostgreSQL | CI/CD | Agile/Scrum

PROFESSIONAL SUMMARY

Java Full Stack Developer with 3.1 years of experience, including 2.6 years at C-DAC building a mission-critical full-stack application for the Indian Navy. Proficient in Java, Spring Boot, Microservices, Apache Kafka, React.js, Docker, and Kubernetes, with hands-on expertise in HA/DR architecture, Redis, OAuth 2.0, and VAPT/security compliance. Skilled in client requirement gathering, solution design, and cross-functional delivery. Seeking a Full Stack Developer role to build scalable, secure enterprise software.

KEY HIGHLIGHTS

- Architected HA/DR infrastructure across **3 data centers and 21 VMs**, and led VAPT remediation that cut security risk exposure by **~30%**.
- Built an automated OTA deployment pipeline serving **200+ ruggedized field devices** with zero manual intervention.
- Authored a **28-page Software Architecture Document** with 11 technical diagrams adopted as the team's architecture reference.
- Cut backend production defects by **20%** through comprehensive API unit testing during internship.

TECHNICAL SKILLS

Languages: Java, Core Java, JavaScript, OOPs, Data Structures

Backend: Spring Boot, Spring Security, Hibernate, Microservices Architecture, RESTful APIs, Apache Kafka, Redis, OAuth 2.0

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design

Database: PostgreSQL, SQL, Database Replication (WAL), High Availability Architecture

DevOps & Cloud: Docker, Kubernetes, CI/CD, Git, GitHub, HAProxy, Keepalived, Patroni, etcd

Tools & Practices: JIRA, Agile/Scrum, API Testing, Unit Testing, VAPT, System/Solution Design, Technical Documentation

WORK EXPERIENCE

Project Associate – Full Stack Developer

Jan 2024 – Present

Centre for Development of Advanced Computing (C-DAC)

Chennai, India

- Delivered full-stack development for **SARATHI**, a mission-critical Indian Navy application, using Java, Spring Boot, Microservices, React.js, Docker, and Kubernetes across 2.6 years of continuous engagement.
- Architected **High Availability & Disaster Recovery (HA/DR)** infrastructure across 3 data centers and 21 VMs using HAProxy, Keepalived, Patroni, etcd, and PostgreSQL WAL replication with DNS-based failover.
- Designed an automated **OTA update system** deploying Spring Boot builds to 200+ ruggedized field devices via a two-tier agent architecture with version tracking, eliminating manual update effort.
- Engineered **AES-encrypted offline data synchronization** packages and idempotent sync workflows, enabling secure, reliable data exchange for disconnected field deployments.
- Conducted **VAPT** (Vulnerability Assessment & Penetration Testing) across application and network layers, remediating security gaps and reducing risk exposure by approximately 30%.
- Authored a 28-page **Software Architecture Document (SAD)** with 11 technical diagrams for engineering teams and stakeholders.
- Directed client requirement-gathering sessions and solution demonstrations with Indian Navy stakeholders, translating operational needs into technical specifications; coordinated resource allocation and delivery timelines across development, QA, and deployment teams.

Software Development Intern

6 Months

Airborne Excursions – Oyite Private Limited

Remote

- Developed and maintained backend modules using Spring Boot, Java, and RESTful APIs; used Git/GitHub for version control.
- Performed comprehensive unit testing of backend APIs, improving system reliability and reducing production defects by 20%.

PERSONAL PROJECTS

LinkedIn Clone – Full Stack Social Networking Platform

- Architected a full-stack LinkedIn-style social networking app using **Java, Spring Boot, and Microservices architecture**, with Apache Kafka powering asynchronous, event-driven communication between services.
- Containerized and orchestrated services using **Docker and Kubernetes**, enabling scalable, fault-tolerant deployment across independently-scaling microservices.
- Integrated **Redis** as a caching layer to cut repeated database calls and speed up data retrieval for high-traffic endpoints.
- Secured the platform with **OAuth 2.0** token-based authentication and authorization, enforcing consistent access control across microservices.

CERTIFICATIONS

Spring Boot 1 to 100 – Expert | Foundational C# with Microsoft | Core Java | Complete Linux Training Course to Get Your Dream IT Job (2024)

EDUCATION

- PG Diploma in Computers – Centre for Development of Advanced Computing (C-DAC) | Marks: 75% | 2024
- B.Tech / B.E. in Computer Engineering – Arvind Gavali College of Engineering, Satara | CGPA: 8.06/10 | 2022

ADDITIONAL INFORMATION

- Languages: English, Hindi, Marathi, Tamil
